

## MEDIA KIT

This media kit is used to provide current and future clients with reliable information that has been verified by Geotech for external communications.

## COMPANY OVERVIEW

### ABOUT GEOTECH

Geotech is a privately owned company established in 1981, with its' corporate headquarters and research and development facility in Aurora, ON, Canada. Geotech specializes in airborne geophysical survey mapping, data processing and data interpretation. Geotech and its sister companies operate on a global scale with offices in Australia, Brazil, Barbados, Ghana and South Africa. Clients include minerals and mining, groundwater, oil and gas, government and environmental industries. For more information about Geotech, and its products and services please visit [www.geotech.ca](http://www.geotech.ca).

### VTEM™

Geotech's proprietary Versatile Time Domain Electromagnetic (VTEM™) design is the leading time domain electromagnetic system in the industry. VTEM™ is the system of choice for airborne geophysical surveys with over 2,000,000 line-kilometers flown over a variety of different host geologies. Features include the best signal-to-noise levels, three diameter options for depth and terrain, adjustable dipole moments of 250,000 NIA over 2.5 Million NIA, single mag or horizontal mag options and adjustable pulse width.

### ZTEM™

Geotech's proprietary ZTEM™ design is an innovative time domain electromagnetic system z-tipper axis electromagnetic system. The unique ZTEM™ system leverages the earth's natural or passive fields from thunderstorm activity as a source of transmitted energy. The receiver design, advanced digital electronics and signal processing allow for lower noise levels, exceptional resolution and unparalleled depth penetration up to 2 kilometers. ZTEM™ is well suited for mapping deeply buried, porphyry hosted and structurally controlled target types.

### MAGNETIC

Please speak with a Geotech representative for more information on your specific magnetic program.
